

Jean Richardson

Frontend Developer | UI/UX Designer (Design Systems & Interaction)

Portfolio: [JR Studio](#) | [Linkedin](#) | [GitHub](#) | jean.richardson610@gmail.com | Phoenix, AZ

Frontend Developer with a strong UI/UX foundation, specializing in building high-performance, scalable web applications with React and TypeScript. Experienced in architecting interactive systems, designing responsive, production-ready interfaces, optimizing performance for complex, state-driven UIs and clean component architecture.

Keep It Katelin Photography: [View Product](#)

Frontend Developer 2026 – Present | UI/UX Designer 2020 – Present

- Led end-to-end UI/UX design for a production photography platform, focusing on user flows, wireframing, prototyping, and responsive design
- Transitioned into a frontend development role, building scalable features using React, Next.js, JavaScript, and modern CSS (Flexbox, Grid, Tailwind CSS)
- Engineered a mobile-first gallery experience with swipe navigation, momentum-based gestures, modal components to improve user engagement, and optimized image rendering and state-driven UI behavior
- Optimized image-heavy performance using lazy loading, image preloading, decoding, asset optimization techniques
- Designed and implemented reusable component patterns, contributing to a consistent and scalable design system
- Collaborated with stakeholders on design and functionality, improving usability and overall user experience

Dynata:

UI/UX Designer (Design Systems & Frontend Implementation) June 2022 – Present

- Led the redesign of core internal workflows by synthesizing usability research and stakeholder feedback, reducing navigation friction and improving user satisfaction by 15%.
- Partnered with Product and Engineering to define and deliver responsive UI enhancements that increased user engagement by 20% while ensuring design consistency across platforms.
- Scaled and maintained design system implementation by translating product requirements into accessible, production-ready UI assets aligned with WCAG standards and frontend development best practices.
- Architected and maintained a reusable library of responsive HTML/CSS email templates and marketing components, improving consistency and cross-client rendering reliability.

[Projects \(personal\)](#)

Spatia – AI-Powered Architectural Visualization SaaS: [Live Demo](#) | [GitHub Link](#)

- Architected and shipped an AI-powered SaaS platform that converts 2D floor plans into photorealistic 3D renders using Claude and Gemini APIs, supported by a serverless architecture with KV-based asset storage and a scalable React/TypeScript frontend optimized for AI-driven workflows

JR Canvas – Interactive Web Canvas: [Live Demo](#) | [GitHub Link](#)

- Built a high-performance interactive canvas system with shapes, text, frames, and layered objects, implementing advanced interactions (drag, resize, rotate, zoom, infinite canvas navigation), real-time text editing, and centralized state management enabling undo/redo and optimized re-renders

Zero_trace - Ephemeral Real-Time Chat Application: [Live Demo](#) | [GitHub Link](#)

- Developed a full-stack real-time chat system with ephemeral rooms and anonymous messaging, implementing secure token-based authentication, Redis/Upstash-powered real-time synchronization, and scalable lifecycle management for room cleanup and event handling

[Technical Skills](#)

Languages: HTML, CSS, JavaScript, TypeScript

Frontend: React.js, Next.js, Putter.js, Vite, Tailwind CSS, Shadcn UI, GSAP, Framer Motion,

State & Data: Zustand, TanStack Query

Backend: REST APIs, ElysiaJS, Strapi, Serverless Architecture, Redis

Design: Figma, Adobe Creative Suite, Typography, Prototyping, Wireframing

Tools: Git, GitHub, Vercel
