

Jean Richardson

Frontend Developer

Portfolio: [JR Studio](#) | [Linkedin](#) | [GitHub](#) | jean.richardson610@gmail.com | Phoenix, AZ

Versatile Frontend Developer with a strong UI/UX foundation, skilled in building responsive, scalable, and visually engaging web applications. Experienced in React, TypeScript, Tailwind CSS, and modern frontend tools, with a proven track record of delivering measurable impact through seamless interfaces, optimized performance, and intuitive user experiences.

Professional Experience

JR Studio Space: [View Product](#)

Remote | February 2026 - Present

Frontend Developer – Self Employed

- Designed and developed **jr-studio.space**, a production-ready React portfolio highlighting interactive frontend projects and modern, modular UI architecture
- Architected mobile-first, accessible interfaces with React, TypeScript, and Tailwind CSS, delivering seamless UX across devices.
- Optimized page performance: lazy loading, component-level code splitting, and efficient asset loading strategies.

Skinstric AI: [Live Demo](#)

Remote | September 2025

Frontend Developer Intern

- Built a multi-page React SPA using react-router-dom (Home, Results, Demographics, Analysis), enabling seamless client-side routing and improved navigation performance
- Integrated REST APIs and asynchronous data fetching using React hooks (useState, useEffect, useCallback) to render AI-generated results in real time.
- Optimized frontend performance through asynchronous API handling, local storage management, and smooth page transitions in development and deployment (Vercel).

Projects (personal)

Spatia – AI-Powered Architectural Visualization SaaS: [Live Demo](#) | [GitHub Link](#)

- Architected an AI-powered SaaS platform converting 2D floor plans into photorealistic 3D renders using Claude and Gemini APIs.
- Implemented serverless architecture, persistent asset hosting, and high-performance KV storage.
- Engineered a scalable, responsive frontend using React, TypeScript, Puter.js, and Tailwind CSS to support AI-driven rendering workflows.

JR Canvas – Interactive Web Canvas: [Live Demo](#) | [GitHub Link](#)

- Built a dynamic, interactive canvas supporting shapes, paths, frames, and editable text with drag, resize, rotation and layering with an infinite scroll canvas
- Implemented double-click text editing with full selection and live updates, applied zoom, pan, shadows, borders, fills, and rich object styling via custom rendering logic for high-performance editing, and managed state centrally to enable real-time manipulation and undo/redo functionality

Zero_trace - Ephemeral Real-Time Chat Application: [Live Demo](#) | [GitHub Link](#)

- Built a full-stack real-time chat app with ephemeral rooms, anonymous usernames, and instant text & image messaging.
- Implemented secure access and file uploads, including token-based auth, server-side validation, and scalable image/GIF handling.
- Leveraged Redis and Upstash Realtime for ephemeral data persistence, automatic room cleanup, and live messaging updates.

Technical Skills

Frontend: React.js, Next.js, Puter.js, JavaScript, TypeScript

Styling: Tailwind CSS, Shadcn UI, GSAP, AOS

Backend/Data: Strapi, Puter.js, REST APIs, ElysiaJS, Serverless Architecture, JSON

Tools & Other Platforms: Git, GitHub, Vercel, Vite, Figma, Adobe Creative Suite

Education:

Frontend Simplified | [Frontend Development Certificate](#)

July 2025 – October 2025
