

Jean Richardson

Frontend Developer

Portfolio: [JR Studio](#) | [Linkedin](#) | [GitHub](#) | jean.richardson610@gmail.com | Phoenix, AZ

Versatile Frontend Developer with a strong UI/UX foundation, skilled in building responsive, scalable, and visually engaging web applications. Experienced in React, TypeScript, Tailwind CSS, and modern frontend tools, with a proven track record of delivering measurable impact through seamless interfaces, optimized performance, and intuitive user experiences.

Professional Experience

JR Studio Space: [View Product](#)

Remote | February 2026 - Present

Frontend Developer – Self Employed

- Designed and developed **jr-studio.space**, a fully responsive portfolio showcasing personal and freelance frontend projects.
- Built interactive, mobile-first interfaces using React, TypeScript, and Tailwind CSS, emphasizing seamless UX and accessibility.
- Implemented smooth page transitions, animations, and interactive UI components to create engaging user experiences.

Skinstric AI: [Live Demo](#)

Remote | September 2025

Frontend Developer Intern

- Built dynamic multi-page React applications (Home, Results, Demographics, Analysis) using react-router-dom, improving UX consistency and enabling seamless client-side navigation.
- Developed reusable, conditional components to dynamically render content based on user interactions and route changes.
- Integrated API data handling and state management with useState, useEffect, useCallback to fetch and display AI-driven results in real time.
- Enhanced UI interactions with hover effects, animations, circular progress bars, and dynamic buttons, making complex data visually engaging.
- Optimized frontend performance through asynchronous API handling, local storage management, and smooth page transitions in development and deployment (Vercel).

Projects (personal)

Spatia – AI-Powered Architectural Visualization SaaS: [Live Demo](#) | [GitHub Link](#)

- Built a SaaS platform transforming 2D floor plans into photorealistic 3D renders using AI models Claude & Gemini.
- Implemented serverless architecture, persistent asset hosting, and high-performance KV storage.
- Developed with React, TypeScript, Puter.js, and Tailwind CSS for a scalable, responsive frontend.

Fitlytics – Full Stack Fitness Tracking App: [Live Demo](#) | [GitHub Link](#)

- Designed a full-stack fitness tracker with AI-powered food image analysis.
- Built with React and Strapi, styled using Tailwind CSS, and integrated Google Gemini AI for smart recommendations.

React Weather Dashboard : [Live Demo](#) | [GitHub Link](#)

- Developed a modern, responsive weather dashboard with React, Tailwind CSS, and Shadcn UI
- Leveraged TanStack Query for efficient data fetching and state management.
- Features include current, hourly, and daily forecasts, live weather maps, and seamless light/dark mode switching.

Technical Skills
